Summary

Electronics & Telecommunication graduate (2026) with skills in SQL, Python, Excel and Power BI. Project experience in data cleaning, exploratory analysis and dashboard development using sales, customer and lending data. Seeking an entry-level data analyst role focused on reporting and business insights.

Technical Skills

Languages: Python, SQL

Data Analysis: Pandas, NumPy, data cleaning, exploratory data analysis (EDA), RFM segmentation

Visualisation & Reporting: Power BI, Excel (Pivot Tables, Power Query), Matplotlib, Seaborn

Machine Learning: Scikit-learn, classification, regression, feature engineering, model evaluation

Tools: MySQL, Jupyter Notebook, Git, GitHub, VS Code

Experience

YBI Foundation — AI & Data Science Intern

Dec 2024 – Feb 2025

Remote

- Built classification and regression models in Python, performing exploratory analysis, data cleaning and feature engineering.
- Evaluated models using train-test validation and documented findings with Matplotlib and Seaborn visualisations.

Projects

E-Commerce Sales & Customer Behaviour Analysis

Python, SQL, Power BI, Excel

- Analysed order and customer data using SQL and Python; applied RFM segmentation to compare customer purchasing behaviour.
- Built Power BI dashboards to track revenue trends, repeat purchases and customer-segment performance.

Bank Loan Default Risk Analysis

Python, SQL, Scikit-learn, Power BI

- Built a loan-default classification model using Scikit-learn, engineering features from borrower, income and credit-history data.
- Analysed default patterns across borrower segments and presented findings in a Power BI risk dashboard.

WooCommerce Catalogue Data Cleanup

Excel, Power Query, SQL

- Cleaned and restructured approximately 1,779 drone and UAV product records for a WooCommerce catalogue.
- Standardised product attributes, categories and specifications into a consistent bulk-import-ready structure.

Shop Counter — Offline Billing & Inventory App

Flutter, Dart, SQLite

- Developed an Android app for a family retail business with billing, CGST/SGST calculations, stock tracking and repair-job workflows.
- Designed a local SQLite database for offline operation and a Romanised Marathi interface for shop staff.

Education

KCT's Late G. N. Sapkal College of Engineering, Nashik

2022 – 2026

B.E., Electronics & Telecommunication — SPPU

CGPA: 6.89/10 | Final Semester SGPA: 7.53/10

HSC: Late Vilas Nana Sonawane Jr. College

2022 | 79.50%

SSC: Nampur English School

2020 | 85.55%

Certifications & Coursework

Certificate: AI & Data Science Internship — YBI Foundation, 2025

Coursework: DBMS, Machine Learning, Data Mining, Probability & Statistics, Artificial Intelligence, Data Structures & Algorithms
